HTML, CSS, JavaScript, Markdown,  
Nunjucks, Git

### 3D Printing

G-Code, CAD, Prototyping

### Pursuing Certifications

MEF, CCNP, JNCIP

## Education

### Long County High School

2009 - 2013

## Summary

Telecommunications engineer with 10+ years experience in service provider environments, specializing in the design, activation, and support of complex Ethernet services. Proven ability to troubleshoot and resolve network constraints. Seeking a challenging environment where continuous learning and meaningful contributions go hand-in-hand with a healthy work-life balance.

## Work Experience

### Sparklight / Hargray

#### Service Activation Engineer II

September 2025 - Present

- Engineered and deployed 200+ new DIA, EPL, and CBH Ethernet services while maintaining a 99% on-time completion rate.
- Maintained a 100% success ratio for all executed network changes.

#### Service Activation Engineer I

June 2024 - August 2025

- Resolved core network capacity constraints, enabling the deployment of multi-gigabit services for over 20+ enterprise clients and carriers.
- Contributed critical expertise to key company initiatives including a billing system migration and IP infrastructure upgrade project.

#### Service Activation Technician III

April 2023 - June 2024

#### Service Activation Technician II

July 2020 - April 2023

#### Service Activation Technician

May 2017 - July 2020

#### IT - Helpdesk Analyst

Feb 2016 - May 2017

#### TAC Support Technician

May 2014 - Feb 2016

## Skills
